

System X Crystal Ceramic Coating is a professional grade coating - offering superior protection from chemical etching due to environmental impacts. Crystal imparts an outstanding gloss, and protects your paint from everyday contamination through its tough chemical resistance and release properties.

Crystal is great at adding a deep, glossy layer of protection at a lower price point. This hard self-cleaning coating eliminates the need to re wax or seal every few months.

Crystal protects your vehicle's paint from the damaging effects of acid rain, UV rays, salt, and environmental pollutants. The strong bond created by the ceramic coating provides excellent durability in any environment.

Crystal will leave your paint slick and extremely easy to clean. The optically clear ceramic layer formed by System X Crystal prevents bonded contaminants from getting a hold in your paint. Tree sap, tar, water spots, and other paint contaminants are easy to remove.

Crystal's high gloss transparent shield equals longer lasting paint protection that repels water, dirt, road salt, ice, snow, and other environmental contaminants, leaving your vehicle cleaner for extended periods between washes.

Our easy-to-use ceramic paint coating provides longer lasting paint protection than any wax or paint sealant.

The biggest advantages to using Crystal are its self cleaning effect and its ability to withstand harsh winter environments where the temperature, road salt, and chemicals used on the road are destructive to your paint.

### **Crystal application/\$1000 2-3 years**

**Pro:** Your automobile deserves nothing but the best. That's why owners and collectors of the finest vintage and exotic automobiles worldwide choose System X Automotive Ceramic Protection. Quite Simply, they trust System X Ceramic Coatings to consistently provide unmatched paint protection, hardness, and brilliance.

Exhibiting an extremely durable, color enhancing gloss which protects exterior surfaces including paint, metal, exhaust, stainless steel, and wheels.

System X Pro is a semi-permanent coating that actually becomes the functional surface of your vehicle's paintwork. By creating an inseparable bond on a molecular level with your paintwork you get a coating that cannot be washed off like a wax or sealant.

***PROTECTION FROM HARMFUL ENVIRONMENTAL FACTORS*** From salt to sand, exhaust, pollutants, insect contaminants, moisture and UV rays, your automobile is vulnerable to numerous types of element-related corrosion. In bonding to the substrate, System X Ceramic Protection provides a ceramic shield that can't be washed off.

***LONG-LASTING BEAUTY WITH MINIMAL MAINTENANCE*** The unique formula of System X Ceramic Protection locks in long-lasting beauty by keeping paint clean and retaining high gloss. The result? Greatly reduced time and expenses related to ongoing care and maintenance.

***APPLICATION VERSATILITY*** The System X line is specifically formulated to enable application on virtually all dirt and corrosion-prone surfaces of your car - whether interior or exterior. That means powerful protection for everything from steel and aluminum to leather vinyl, fabric, carpet, and glass.

***UV PROTECTION*** The sun is relentless in its assault on your automobile's appearance. System X Auto Ceramic Protection provides maximum UV ray protection for paint, to prevent unsightly damage associated with aging and fading colors.

System X acts as a second clear coat that provides increased protection against the elements.

This new clear coating is glossier, chemical resistant, and harder than the original clear coat. Providing incredible protection against minor scratches, swirl marks, acid rain, bird droppings, and harmful UV rays. Easy hand application only takes 15 - 20 minutes.

System X is not a your typical wax or ceramic paint sealant, which only forms a sacrificial shield of protection. Instead, it bonds into your paintwork or metal creating a semi-permanent glossy shell over the surface.

This shell provides a slick and easy to clean barrier against the elements by repelling water and preventing the adherence of contaminants.

Regular washing is the only maintenance needed to keep your vehicle looking fantastic. The coating can even be waxed or sealed over with your favorite product to intensify gloss.

System X paint protection can be applied to the entire exterior of your vehicle, except rubber and soft plastic. System X also performs exceptionally well on alloy wheels and aircraft exhaust ports.

System X Ceramic Coating bonds into the paint work's microscopic pores, forming an extremely durable crystal clear ceramic finish. This provides genuine long-term protection.

Testing has shown System X Coatings to be extremely resilient to solvents, weathering, and general wear and tear.

As you can see in the System X videos, this coating demonstrates resistance to almost anything and a capacity to keep vehicles looking cleaner for longer through its hydro-repellent nature.

View the Saltwater Submersion Test to see how System X can protect your car from road salts, your boat from salt water, and your aircraft from harsh de-icing solutions.

Check out the Detergent Wash Test to see how System X holds up to 150 washes with DAWN detergent without degrading.

What if you need to paint or touch-up your paintwork? No problem. Since System X is only a couple microns thick you can polish or compound the coating off before completing these tasks.

System X is produced and packaged to minimize environmental damage and ensure the freshest possible product.

**Pro Application/\$1500 6 year warranty**

**Diamond:** System X Diamond represents a revolutionary advance in paint protection. An exclusive, permanent ceramic coating which imparts a color enhancing gloss while protecting exterior surfaces for the Lifetime of new cars, and up to 8 years on used cars.

Element 119 is known as one of the first laboratories to harness SiO<sub>2</sub> technology and is the leader in innovation and improvement of ceramic paint protection technology worldwide.

Like no other product, System X Diamond provides paint protection with previously unachievable levels of gloss, durability and chemical resistance.

Diamond was designed specifically for those with discerning tastes for an exceedingly rich and glossy finish, as well as its ability to resist elements and protect for the lifetime of your car.

Diamond's composite structure offers the ultimate in ceramic protection plus the same slick finish and candy like gloss as the very best carnauba waxes.

System X Diamond blankets your vehicle in a glossy shell of ceramic protection that enhances all colors. Black will appear deeper; red will pop with bright reflections; white and silver will appear as if dipped in glass.

Diamond will make your car shine stronger than it ever has. Relentless water beading and the self-cleaning effect will keep your car looking great in between washes.

The cost of maintaining your vehicle is decreased due to less maintenance being required to keep the exterior looking clean and shiny. Diamond withstands repeated car washes without wearing thin for true long term protection.

Diamond will repel dirt, oil, dust, and road grime to provide incredible ease of care.

**Diamond Application/\$2500 Lifetime warranty**

**Max Application/\$2000 9 year warranty**
